ARKAD'S LEDGER

Day 1 Production Package

Publishing date: Friday 9 October 2026 (US Eastern) · Myanmar: Fri 9 Oct, 6:00 PM → Sat 10 Oct, 8:00 AM

Prepared 8 Oct 2026 · 5 videos · YouTube Shorts · TikTok · Facebook Reels · Nothing in this package has been posted or scheduled

Scripts · Timestamps · Animation prompts · Platform metadata · Verified sources

1. Day 1 Run Sheet

#	ET (Fri 9 Oct)	Myanmar (Asia/Yangon)	UTC	Final title	Pillar	Format · Series	Words	Est. at 150 wpm	Final length (incl. pauses)
1	7:30 AM ET	6:00 PM, Fri 9 Oct 2026	11:30 UTC, 9 Oct	Banks Don't Lend Out Your Savings. They Do Something Stranger.	P1 Money & Banking	F11 Myth → Mechanism · *The Money Machine* · *Ep. 1*	235	94 s	**~96 s**
2	12:00 PM ET	10:30 PM, Fri 9 Oct 2026	16:00 UTC, 9 Oct	The 1-Cent Trick Your Brain Falls For — Even When Buying a Car	P3 Everyday Economics & Pricing Psychology	F4 Counter That Lies · *Price Tag Psychology* · *Ep. 1*	203	81 s	**~84 s**
3	4:00 PM ET	2:30 AM, Sat 10 Oct 2026	20:00 UTC, 9 Oct	The Airline Business Hiding Inside Your Credit Card	P8 Business Models & Corporate Economics	F3 The Receipt · *Follow the Money* · *Ep. 1*	226	90 s	**~93 s**
4	7:00 PM ET	5:30 AM, Sat 10 Oct 2026	23:00 UTC, 9 Oct	How a Country Ended Up Printing a 100 Trillion Dollar Note	P10 Crises, Bubbles & Economic History	F9 Timeline Rewind (with Counter That Lies motif) · *Collapse Files* · *No. 001*	336	134 s	**~138 s**
5	9:30 PM ET	8:00 AM, Sat 10 Oct 2026	01:30 UTC, 10 Oct	The Rule of 72: One Number Behind Savings, Debt and Inflation	P4 Debt, Credit & Interest	F5 Build-a-Formula · *Ledger Formulas* · *Ep. 1*	209	84 s	**~86 s**

Cross-posting per slot (from the approved strategy): TikTok at the slot time → YouTube Shorts +10 min → Facebook Reels +20 min. Upload a separate clean master to each platform (no watermarks). Slots 3–5 fall overnight in Myanmar, so the owner schedules them with the platforms' own schedulers. **This package does not post or schedule anything.**

Timing method: word counts treat hyphenated words as one word and spell out every number as it will be spoken. "Est. at 150 wpm" = words ÷ 150 × 60. "Final length" adds the scripted pauses (0.2–0.6 s between beats) plus a 0.5 s end tail. Every video is ≥ 83 s, well above the 60 s floor. After generating the AI voice, check the real length and adjust speed within 0.95–1.05× so no video drops below 62 s.

2. Global Production Specs (all 5 videos)

Item	Spec
Export	1080×1920, 9:16, 30 fps, H.264 high-bitrate MP4, AAC 48 kHz stereo; one clean master per platform (no watermark, no other platform's end card)
AI narration	One consistent narrator voice for the brand: calm, confident, mid-low register, ~150 wpm, small pause before each Reveal. Pronunciation notes are listed per video
Music & sound	Subtle low pulse/ambient bed under -18 to -22 dB relative to voice; gold "tick" SFX on number reveals; a soft whoosh on match-cuts. Use only royalty-free or properly licensed tracks; avoid trending copyrighted audio
Captions	Burned-in, bold sans (e.g., Inter/Montserrat), ivory with navy box, 2–5 words per line, key word in gold #EBA929; placed in the centre-lower safe area, clear of the bottom fifth and right edge
On-screen data text	Added in the edit, never generated in-image. Serif headlines (Playfair Display / Georgia) in gold; numbers in tabular sans; source tag bottom-left, small, slate #8A94A6
Series badge	Small top-left badge with series name + episode, visible for the first 3 s

Item	Spec
AI disclosure	All scenes are clearly animated, not photorealistic: YouTube "altered or synthetic" = No; TikTok AI label not required. Switch both on if any generated shot looks photorealistic
Disclaimer	"Educational content only — not financial advice." in every description/caption
Sources	YouTube: in description. TikTok: pinned comment. Facebook: first comment (text provided per video)

Master style block (paste ahead of any scene prompt if your generator supports a global style):

```
Vertical 9:16, 1080x1920, 30 fps, premium editorial motion graphics, 2.5D depth with gentle parallax.
Background Ledger Navy #051530 fading to Vault Navy #010922 vignette; panels Midnight Blue #0B2A5B; key
highlight Arkad Gold #EBA929; soft gold glow #E7BB4E; ivory #F4EEDC for light elements; Loss Coral
#D9644A only for negative values. Thin gold line-art, engraved / ledger-paper textures, classical motifs
(columns, coins) combined with clean data visualisation; matte surfaces, soft volumetric light, smooth
eased camera moves. No photorealistic people, no real logos, NO text rendered inside the image (all text
is added in the edit). Keep the lower-middle third clear for captions; key objects centred.

NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury
lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions,
gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

3. Pre-publish Checklist (Fri 9 Oct)

- ☐ Every exported video measured at ≥ 62 s and ≤ 180 s
- ☐ On-screen numbers match the source table for each video exactly (units, dates, country)
- ☐ Video 3: Delta usually reports September-quarter results in mid-October. If a new Delta release is out before Slot 3 (4:00 PM ET), the script still stands because it cites full-year 2025 and the June quarter 2026, but re-read the release for any restatement
- ☐ No real logos, no reproductions of real banknotes, no in-image gibberish text
- ☐ Captions proof-read; source tags visible whenever a figure appears; "Illustrative" tag on hypothetical numbers (Videos 1, 2, 5)
- ☐ Per-platform titles, captions and hashtags pasted from this package; source comment ready
- ☐ Upload times converted correctly: Myanmar = ET + 10 h 30 min while the US is on EDT (until 31 Oct 2026)

4. Video 1: Banks Don't Lend Out Your Savings. They Do Something Stranger.

Field	Detail
Slot	Slot 1 · Morning Mechanism · **7:30 AM ET, Fri 9 Oct 2026** · **6:00 PM MMT, Fri 9 Oct 2026** · 11:30 UTC, 9 Oct
Final title	Banks Don't Lend Out Your Savings. They Do Something Stranger.
Pillar	P1 Money & Banking
Format / series	F11 Myth → Mechanism · *The Money Machine · Ep. 1*
Core question	Where does most of the money in your bank account actually come from?
Target duration	90–100 s (60–180 s rule; never under 60 s)
Script length	**235 words** → 94 s at 150 wpm + 2.0 s pauses + 0.5 s tail = **~96 s final**

1.1 Narration script with timestamps

Beat	Time	Narration (exact AI-voice text)	Words	On-screen text
Hook	0:00–0:04	Banks don't lend out your savings. They create brand-new money.	10	BANKS DON'T LEND YOUR SAVINGS
Setup	0:04–0:22	Most of us picture a vault. Savers put cash in, borrowers take it out, and the bank keeps the difference. The Bank of England calls that picture a misconception. And the last step of the real story is the one almost nobody explains.	43	THE "VAULT" STORY → MYTH · Source: Bank of England, 2014
Development 1	0:22–0:44	Here's what actually happens. Say you're approved for a ten-thousand-dollar loan. The bank doesn't open the vault. It writes two lines in its ledger at the same moment. On one side: you owe the bank ten thousand dollars. On the other: your account now shows ten thousand dollars. No saver's money moved. A brand-new deposit appeared.	56	LOAN +$10,000
Development 2	0:44–1:00	And deposits are what most of us actually use as money. In the United Kingdom, the Bank of England reported that ninety-seven percent of the money held by the public is bank deposits. Only about three percent is cash.	39	97% BANK DEPOSITS · 3% CASH · UK · Bank of England, 2014
Development 3	1:00–1:14	So can banks create unlimited money? No. They need borrowers who can repay. They have to stay profitable. Regulators set safety rules. And the central bank's interest rate makes borrowing cheaper or more expensive.	34	LIMITS: REPAYMENT · PROFIT · REGULATION · INTEREST RATES
Reveal	1:14–1:24	Now the part almost nobody explains. When you repay that loan, both lines disappear. The money isn't returned to a vault. It's destroyed.	23	REPAY → BOTH LINES ERASED
Payoff	1:24–1:31	Every loan creates money. Every repayment erases it. The money supply isn't a pile sitting somewhere. It breathes.	18	LOANS CREATE MONEY. REPAYMENTS ERASE IT.
Loop	1:31–1:36	And somewhere, right now, a bank is writing the next two lines.	12	(none; let the visual loop)

Hook ends at 4.0 s (within the 0–5 s rule ✓). Total: 235 words.

1.2 Scene-by-scene animation prompts

```
ARKAD'S LEDGER · V1 · SCENE 1 · HOOK · 0:00–0:04 · ~4 s
SCENE: Extreme close-up of an open ledger with gold-ruled columns on a navy desk surface. A gold fountain-pen nib writes a single new entry; the ink glows Arkad Gold and a soft gold pulse ripples outward across the page. Slow push-in.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V1 · SCENE 2 · SETUP · 0:04–0:22 · ~18 s
SCENE: Desaturated slate-and-navy 'textbook' diorama: a classical vault door, small figures drawn in thin line-art drop gold coins into it; the coins slide along a track to a second line-art figure on the other side. Then a crack spreads across the whole frame like glass and the diorama shatters into gold dust that drifts upward.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V1 · SCENE 3 · DEVELOPMENT 1 · 0:22–0:44 · ~23 s
SCENE: Camera glides into the ledger, which fills the frame as a two-column gold-ruled page. Two gold entries draw themselves simultaneously, one in the left column and one in the right, connected by a thin gold bracket. In the soft-focus background the vault door stays closed and a small stack of coins remains untouched.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V1 · SCENE 4 · DEVELOPMENT 2 · 0:44–1:00 · ~16 s
SCENE: Split composition: on the left a small stack of stylised paper notes and coins (no real currency designs); on the right a tall classical column built from glowing digital ledger tiles rising high above it. A gold counter area sits in the centre (numbers added in edit). Slow upward tilt following the tall column.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V1 · SCENE 5 · DEVELOPMENT 3 · 1:00–1:14 · ~14 s
SCENE: The ledger sits in the centre; four elegant gold gate frames descend one by one around it, each with a simple engraved icon (handshake, balance scale, shield, percentage dial). As each gate lands, the stream of new gold entries flowing into the ledger slows.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V1 · SCENE 6 · REVEAL · 1:14–1:24 · ~10 s
SCENE: Close-up of the two gold ledger entries. A gold 'repay' seal stamps the page; both entries dissolve together into fine gold dust that blows off the page. The needle of a small engraved gauge dips (gauge label added in edit). Beat of stillness.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V1 · SCENE 7 · PAYOFF · 1:24–1:31 · ~7 s
SCENE: Wide aerial shot pulling back from the single ledger to reveal thousands of ledgers arranged like a city grid at night, gold entries lighting up and fading in slow rhythmic waves, like breathing.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V1 · SCENE 8 · LOOP · 1:31–1:36 · ~5 s
SCENE: Camera dives back down into one ledger, ending on the exact framing of the opening shot: the gold nib touching the page (seamless loop to frame 1).
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

5. Video 2: The 1-Cent Trick Your Brain Falls For — Even When Buying a Car

Field	Detail
Slot	Slot 2 · Everyday Economics · **12:00 PM ET, Fri 9 Oct 2026** · **10:30 PM MMT, Fri 9 Oct 2026** · 16:00 UTC, 9 Oct
Final title	The 1-Cent Trick Your Brain Falls For — Even When Buying a Car
Pillar	P3 Everyday Economics & Pricing Psychology
Format / series	F4 Counter That Lies · *Price Tag Psychology · Ep. 1*
Core question	Why do .99 prices work, and does the effect survive when thousands of dollars are at stake?
Target duration	80–90 s (60–180 s rule; never under 60 s)
Script length	**203 words** → 81 s at 150 wpm + 2.3 s pauses + 0.5 s tail = **~84 s final**

2.1 Narration script with timestamps

Beat	Time	Narration (exact AI-voice text)	Words	On-screen text
Hook	0:00–0:05	Two ninety-nine and three dollars are one cent apart. Your brain disagrees.	12	$2.99 vs $3.00
Setup	0:05–0:16	This isn't about being bad at math. It's about how you read numbers: left to right, with your attention fading as you go. And sellers know it.	27	YOU READ LEFT → RIGHT
Development 1	0:16–0:34	In experiments published in two thousand five, researchers Manoj Thomas and Vicki Morwitz found that prices ending in nine feel cheaper mainly when the first digit changes. Two ninety-nine versus three dollars? A big perceived gap. Two eighty-nine versus two ninety? Almost none. Same one-cent difference.	46	$2.99 vs $3.00 → BIG GAP
Development 2	0:35–0:42	Your brain anchors on the leftmost digit and only half-reads the rest. Economists call it left-digit bias.	17	LEFT-DIGIT BIAS
Development 3	0:42–0:47	Fine for snacks. But surely not when you're spending thousands of dollars?	12	BUT FOR A CAR?
Development 4	0:47–1:06	A team of economists checked more than twenty-two million used-car sales at wholesale auctions. Cars with just under eighty thousand miles sold for about two hundred and ten dollars more than cars just past eighty thousand, but only about ten dollars less than cars a hundred miles lower.	48	22M+ USED-CAR SALES · 79,900–79,999 mi: +$210 vs 80,000–80,100 mi · Lacetera, Pope & Sydnor, AER 2012
Reveal	1:07–1:17	A hundred extra miles barely matter, unless they flip the first digit. Then the price drops off a ledge. And it happens at every ten-thousand-mile mark.	26	PRICE DROPS AT EVERY 10,000-MILE MARK
Payoff	1:18–1:24	Prices are built for your first digit. Read the whole number. The seller already did.	15	READ THE WHOLE NUMBER.

Hook ends at 4.8 s (within the 0–5 s rule ✓). Total: 203 words.

2.2 Scene-by-scene animation prompts

```
ARKAD'S LEDGER · V2 · SCENE 1 · HOOK · 0:00–0:05 · ~5 s
SCENE: A large elegant gold-line price tag hangs centre frame on navy. A mechanical split-flap counter on the tag flips from one value to another (digits added in edit); as it flips, the whole tag visibly shrinks by about a third with a soft whoosh of gold particles.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V2 · SCENE 2 · SETUP · 0:05–0:16 · ~11 s
SCENE: A stylised gold line-art eye scans horizontally across a row of large engraved digit blocks. The first block glows bright gold; each block to the right is progressively veiled in navy fog. Smooth lateral camera track following the gaze.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.

6. Video 3: The Airline Business Hiding Inside Your Credit Card

Field	Detail
Slot	Slot 3 · Follow the Money · **4:00 PM ET, Fri 9 Oct 2026** · **2:30 AM MMT, Sat 10 Oct 2026** · 20:00 UTC, 9 Oct
Final title	The Airline Business Hiding Inside Your Credit Card
Pillar	P8 Business Models & Corporate Economics
Format / series	F3 The Receipt · *Follow the Money · Ep. 1*
Core question	What is a credit card company actually buying from an airline, and why is it worth billions?
Target duration	90–100 s (60–180 s rule; never under 60 s)
Script length	**226 words** → 90 s at 150 wpm + 2.1 s pauses + 0.5 s tail = **~93 s final**

3.1 Narration script with timestamps

Beat	Time	Narration (exact AI-voice text)	Words	On-screen text
Hook	0:00–0:04	American Express paid Delta Air Lines eight point two billion dollars.	11	$8.2 BILLION · card company → airline (2025)
Setup	0:05–0:17	That was in twenty twenty-five, and it's more than Delta's entire operating income that year: five point eight billion. So what exactly is a credit card company buying from an airline?	31	$8.2B PAID vs $5.8B DELTA OPERATING INCOME (FY2025) · Delta Air Lines, 13 Jan 2026
Development 1	0:17–0:38	Follow one tap. When you pay with a Delta co-branded card, the store pays a fee on that purchase. The card company uses part of what it earns to buy SkyMiles from Delta, then drops them into your account. And some cards add perks like baggage fee waivers and lounge access.	51	TAP → STORE FEE → CARD COMPANY → BUYS MILES → YOUR ACCOUNT
Development 2	0:38–0:50	Now look at it from the airline's side. Miles are a currency Delta creates itself. And Delta decides how many miles a seat costs, so it controls the exchange rate.	30	MILES = A CURRENCY THE AIRLINE ISSUES
Development 3	0:50–1:02	And the payments keep growing. In the June quarter of twenty twenty-six alone, American Express paid Delta two point four billion dollars, sixteen percent more than a year earlier.	29	Q2 2026: $2.4B (+16% YoY) · Delta Air Lines, 10 Jul 2026
Caveat	1:02–1:14	To be fair, this isn't pure profit. Every mile is a promise: a seat Delta may owe you later. But the cash arrives today, and the seat comes later.	29	NOT PURE PROFIT: CASH TODAY, SEAT OWED LATER
Reveal	1:14–1:25	So a modern airline runs two businesses at once. One flies planes. The other issues a private currency, and sells it to a card company by the billion.	28	BUSINESS 1: FLYING · BUSINESS 2: ISSUING A CURRENCY
Payoff	1:26–1:32	Every time you tap that card, you're not just buying coffee. You're funding an airline's second business.	17	EVERY TAP FUNDS THE SECOND BUSINESS

Hook ends at 4.4 s (within the 0–5 s rule ✓). Total: 226 words.

3.2 Scene-by-scene animation prompts

```
ARKAD'S LEDGER · V3 · SCENE 1 · HOOK · 0:00–0:05 · ~5 s
SCENE: A sleek generic navy credit card with a thin gold edge (no logo, no text) taps a minimal terminal. A gold receipt prints and unfurls toward the camera, glowing at the total line (figures added in edit). Slow push-in.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V3 · SCENE 2 · SETUP · 0:05–0:17 · ~13 s
SCENE: Two engraved classical columns rise side by side as bar charts on a navy plinth: the left column (gold) rises taller than the right column (ivory). Subtle gold dust settles. Camera dollies sideways between them.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.

7. Video 4: How a Country Ended Up Printing a 100 Trillion Dollar Note

Field	Detail
Slot	Slot 4 · Flagship Story · **7:00 PM ET, Fri 9 Oct 2026** · **5:30 AM MMT, Sat 10 Oct 2026** · 23:00 UTC, 9 Oct
Final title	How a Country Ended Up Printing a 100 Trillion Dollar Note
Pillar	P10 Crises, Bubbles & Economic History
Format / series	F9 Timeline Rewind (with Counter That Lies motif) · *Collapse Files · No. 001*
Core question	How does a currency die, and why can't you fix it by printing bigger notes?
Target duration	130–145 s (60–180 s rule; never under 60 s)
Script length	**336 words** → 134 s at 150 wpm + 3.3 s pauses + 0.5 s tail = **~138 s final**

4.1 Narration script with timestamps

Beat	Time	Narration (exact AI-voice text)	Words	On-screen text
Hook	0:00–0:04	This is a real banknote. One hundred trillion dollars.	9	100,000,000,000,000 DOLLARS
Setup	0:04–0:16	And by the time it was printed, almost nobody wanted it. To understand how a country gets here, we have to rewind. This is Collapse File number one: Zimbabwe.	29	COLLAPSE FILE No. 001 · ZIMBABWE
Development 1	0:16–0:30	March two thousand seven. Prices in Zimbabwe are rising more than fifty percent in a single month. That's the line economists use to define hyperinflation. Prices that rise that fast double in less than two months.	36	MARCH 2007: >50% A MONTH = HYPERINFLATION · Hanke & Kwok, Cato Journal 2009 (Cagan definition)
Development 2	0:30–0:42	Why? The central bank keeps creating money, faster and faster. And when money grows much faster than the goods it can buy, prices have only one way to go.	29	MORE MONEY, SAME GOODS → HIGHER PRICES
Development 3	0:42–0:52	By July two thousand eight, the official annual inflation rate is two hundred and thirty-one million percent. And then the official statistics simply stop.	24	JULY 2008: 231,000,000% (official, annual) · BBC, 29 Jan 2009 · then: no more official data
Development 4	0:52–1:05	So the central bank tries a trick. In two thousand eight, it cuts ten zeros off the currency. Ten billion old dollars become one new dollar. Within months, the zeros grow right back.	33	2008: 10 ZEROS REMOVED → THEY GROW BACK
Development 5	1:06–1:20	Economists Steve Hanke and Alex Kwok later rebuilt the missing data. Their estimate for mid-November two thousand eight: prices rising seventy-nine point six billion percent in a single month. Prices were doubling roughly every twenty-five hours.	36	MID-NOV 2008: 79,600,000,000% IN ONE MONTH · PRICES DOUBLING EVERY ~24.7 HOURS · Hanke & Kwok, Cato Journal 2009
Reveal	1:21–1:40	Here's the loop that makes it explode. More money pushes prices up. People expect prices to keep rising, so they spend their money the moment they're paid, before it loses value. That rush to spend pushes prices up even faster. And the faster prices rise, the faster everyone spends.	49	MORE MONEY → HIGHER PRICES → SPEND FASTER → HIGHER PRICES

Beat	Time	Narration (exact AI-voice text)	Words	On-screen text
Development 6	1:40–2:00	In January two thousand nine, the hundred-trillion-dollar note arrives. Two weeks later, the government officially allows business in foreign currencies, like the US dollar and the South African rand, which people were already using. One Harare resident told the BBC that even street vendors were refusing Zimbabwean notes.	48	JAN 2009: Z$100 TRILLION NOTE · 29 JAN 2009: FOREIGN CURRENCIES ALLOWED · BBC; Reuters
Context	2:00–2:07	Only one hyperinflation in history was worse: Hungary in nineteen forty-six, where prices doubled about every fifteen hours.	18	WORSE: HUNGARY, JULY 1946: PRICES DOUBLING EVERY ~15 HOURS · Hanke & Kwok 2009
Payoff	2:08–2:14	Money is a promise. Once people stop believing it, it doesn't matter how many zeros you print.	17	MONEY IS A PROMISE.
Loop	2:14–2:18	This note isn't a joke. It's a warning.	8	(none; let the visual loop)

Hook ends at 3.6 s (within the 0–5 s rule ✓). Total: 336 words.

4.2 Scene-by-scene animation prompts

```
ARKAD'S LEDGER · V4 · SCENE 1 · HOOK · 0:00–0:04 · ~4 s
SCENE: A stylised, engraved-style banknote drawn entirely in thin gold line-art on navy (generic design, NOT a reproduction of any real note) floats centre frame and slowly rotates in 2.5D. A row of zeros engraves itself across it one by one (zeros added in edit for accuracy).
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 2 · SETUP · 0:04–0:16 · ~12 s
SCENE: The note shrinks and slides onto a long horizontal gold timeline rail that extends into depth. A brass dossier tab with an engraved 'No. 001' style motif swings into frame (text in edit). Camera rewinds rapidly backward along the rail, motion-blurred tick marks flying past.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 3 · DEVELOPMENT 1 · 0:16–0:30 · ~15 s
SCENE: The camera stops at an early point on the timeline. A simple engraved price tag hangs beside a generic loaf-of-bread icon; a thin gold horizontal threshold line glows across the frame, and a rising gold line crosses it.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 4 · DEVELOPMENT 2 · 0:30–0:42 · ~12 s
SCENE: An ornate printing press in gold line-art runs faster and faster, sheets of generic notes cascading out; next to it a small fixed row of goods icons (bread, milk, fuel can) stays the same size. Gold arrows above the goods point upward.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 5 · DEVELOPMENT 3 · 0:42–0:52 · ~10 s
SCENE: Further along the timeline: a large mechanical counter spins so fast its digit wheels blur into gold streaks. Then a heavy engraved shutter slams down over a 'statistics' ledger, and the ledger page goes blank.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 6 · DEVELOPMENT 4 · 0:52–1:06 · ~13 s
SCENE: Close-up of a generic gold line-art note with a long row of zeros. A gold eraser sweeps across and wipes ten zeros away in a burst of dust; then, in time-lapse, new zeros sprout back across the note like vines. (Counter That Lies motif.)
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 7 · DEVELOPMENT 5 · 1:06–1:21 · ~15 s
SCENE: A large engraved clock face; with each full sweep of its gold hand, a price tag beside it doubles in size, faster and faster, until the tag fills the frame. Tension builds; the clock ticks loudly.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 8 · REVEAL · 1:21–1:40 · ~20 s
SCENE: Clean circular loop diagram engraved in gold on navy: four nodes (press, price tag, running clock, coins leaving a hand) connected by glowing arrows. The loop starts slow and accelerates, its glow intensifying into a bright gold ring.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 9 · DEVELOPMENT 6 · 1:40–2:00 · ~20 s
SCENE: The generic 100-trillion note returns at the end of the timeline. Beside it, a simple market-stall counter drawn in line-art: generic coins tagged USD and ZAR (tags added in edit) slide onto the counter, while the gold note slowly drains to grey and slides off the edge.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 10 · CONTEXT · 2:00–2:08 · ~8 s
SCENE: Camera pulls back to reveal a gallery wall of framed timelines (museum style). One frame further down the wall lights up gold with a small map silhouette of Hungary, then dims.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 11 · PAYOFF · 2:08–2:14 · ~7 s
SCENE: Back to the single grey note centre frame. It dissolves into gold particles that hover in a soft glowing band (the word TRUST is added there in the edit), then the particles disperse.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

```
ARKAD'S LEDGER · V4 · SCENE 12 · LOOP · 2:14–2:18 · ~3 s
SCENE: The particles re-assemble into the gold line-art 100-trillion note, rotating exactly as in the opening shot (seamless loop to frame 1).
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

8. Video 5: The Rule of 72: One Number Behind Savings, Debt and Inflation

Field	Detail
Slot	Slot 5 · Night Formula · **9:30 PM ET, Fri 9 Oct 2026** · **8:00 AM MMT, Sat 10 Oct 2026** · 01:30 UTC, 10 Oct
Final title	The Rule of 72: One Number Behind Savings, Debt and Inflation
Pillar	P4 Debt, Credit & Interest
Format / series	F5 Build-a-Formula · *Ledger Formulas* · *Ep. 1*
Core question	How long does it take money, debt or prices to double, and why does the same formula cut both ways?
Target duration	85–95 s (60–180 s rule; never under 60 s)
Script length	**209 words** → 84 s at 150 wpm + 1.8 s pauses + 0.5 s tail = **~86 s final**

5.1 Narration script with timestamps

Beat	Time	Narration (exact AI-voice text)	Words	On-screen text
Hook	0:00–0:05	Divide seventy-two by any interest rate. The answer shapes your financial life.	12	72 ÷ RATE = ?
Setup	0:05–0:19	It's called the Rule of seventy-two. Divide seventy-two by a yearly rate, and you get roughly how many years it takes for something to double. Savings, debt, even prices. Let's run it three ways.	34	72 ÷ YEARLY RATE (%) ≈ YEARS TO DOUBLE
Development 1	0:19–0:32	First, money growing at six percent a year. Seventy-two divided by six is twelve, so it doubles in about twelve years. At nine percent? About eight years. These rates are just examples, not predictions.	34	6% → ~12 YEARS · 9% → ~8 YEARS · Illustrative rates
Development 2	0:33–0:46	Now flip it. A debt growing at twenty-four percent a year, with nothing paid off. Seventy-two divided by twenty-four is three. That balance doubles in about three years. Same formula, working against you.	33	DEBT AT 24% → DOUBLES IN ~3 YEARS · Illustrative, no payments made
Development 3	0:46–0:58	And inflation. If prices rise three percent a year, seventy-two divided by three is twenty-four. Prices double in about twenty-four years, which means the same money buys half as much.	30	PRICES AT 3% → DOUBLE IN ~24 YEARS = HALF THE BUYING POWER · Illustrative
Reveal	0:59–1:13	Why seventy-two? The exact math uses logarithms, but at everyday rates, seventy-two lands very close. And it divides neatly by two, three, four, six, eight, nine and twelve, so you can do it in your head.	36	EXACT: ln 2 ÷ ln(1 + r) · 72 ÷ 2, 3, 4, 6, 8, 9, 12
Payoff	1:13–1:21	Same formula, three directions. Compounding doesn't care whose side it's on. It just helps to know which side you're on.	20	SAME FORMULA. THREE DIRECTIONS.
Loop	1:21–1:25	So: seventy-two, divided by a rate. What do you get?	10	72 ÷ ?

Hook ends at 4.8 s (within the 0–5 s rule ✓). Total: 209 words.

```

```
ARKAD'S LEDGER · V5 · SCENE 7 · PAYOFF · 1:13–1:21 · ~8 s
SCENE: All three lanes converge into the single glowing formula at the centre; the camera pulls back to show the whole ledger page lit in gold.
STYLE: 9:16 vertical 1080x1920, 30 fps, premium editorial motion graphics, 2.5D parallax. Palette: background #051530 → #010922 vignette, panels #0B2A5B, highlight gold #EBA929, glow #E7BB4E, ivory #F4EEDC, coral #D9644A for negatives only. Thin gold line-art, engraved/ledger-paper texture, classical motifs + clean data viz, matte surfaces, soft volumetric light, smooth eased camera. No people, no logos, no text in image; keep lower-middle third clear for captions.
NEGATIVE: cartoon, childish, mascot, neon, cyberpunk, glossy plastic 3D, cash piles, sports cars, luxury lifestyle, stock-photo faces, photorealistic humans, real brand logos, real banknote reproductions, gibberish text, letters, watermarks, cluttered frame, lens flares overload
```

Facebook Reels	**Caption:** A simple rule that shows how fast money, debt and prices can double, and why it works both ways. (Rates shown are examples, not forecasts. Educational, not financial advice.) · **First comment:** "Sources: https://www.investor.gov/additional-resources/information/youth/teachers-classroom-resources/what-compound-interest · https://www.stlouisfed.org/open-vault/2018/september/how-compound-interest-works"	#economics #money

5.4 Verified sources (every figure used)

Figure / claim in video	What it measures	Date	Source	Link
Rule of 72: 72 ÷ rate ≈ years to double; e.g., 9% → about 8 years	Approximation of doubling time under compounding	Accessed 8 Oct 2026	U.S. SEC, Investor.gov, "What is compound interest?"	https://www.investor.gov/additional-resources/information/youth/teachers-classroom-resources/what-compound-interest
Compound interest explanation and estimation	Explainer	Sept 2018	Federal Reserve Bank of St. Louis, Open Vault (page returned a server error when re-checked 8 Oct 2026; listed in search results)	https://www.stlouisfed.org/open-vault/2018/september/how-compound-interest-works
3%, 6%, 9%, 24% rates	Illustrative only, not current market rates or forecasts	n/a	n/a	(not a sourced figure)
Exact doubling times: 3% → 23.45 y; 6% → 11.90 y; 9% → 8.04 y; 24% → 3.22 y	Maths check: ln 2 / ln(1+r)	n/a (calculation)	Calculated	(not a sourced figure)

9. Verification Status & Open Items

Verified on 8 Oct 2026 against primary or original sources: every figure in the five scripts. That covers the Bank of England 2014 bulletins (text checked in the PDF), the Lacetera/Pope/Sydnor working paper (checked in the PDF), Delta's FY2025 and Q2 2026 releases and 2025 10-K (checked in the source text), Hanke & Kwok 2009 (full text and tables checked), BBC 29 Jan 2009 (checked), and the SEC Investor.gov Rule of 72 page (checked).

Not fully re-verified / notes:

- **Reuters (Jan 2009) and ABC (16 Jan 2009) on the Z$100 trillion note launch date:** confirmed via search listings; the pages timed out when fetched directly. The BBC article (verified) independently confirms the note was "recently introduced" by 29 Jan 2009.
- **St. Louis Fed Open Vault (Sept 2018):** returned a server error when re-checked; Video 5's figures rest on the SEC Investor.gov page (verified) plus maths.
- **Illustrative, not data:** the $10,000 loan (V1); the $2.89/$2.90 price pair (V2, an illustration of the published finding, not the study's exact stimuli); all interest and inflation rates in V5.
- **Delta September-quarter 2026 results** may be released around the publishing date. Re-check before Slot 3 (see checklist).
- **Not used, because it is unverified in a primary source:** a reported Delta forecast of ~$9B remuneration for 2026 (appears only in a third-party earnings-call transcript).

Pronunciation notes for AI voice: "Morwitz" = MOR-wits · "Lacetera" = lah-cheh-TEH-rah · "Sydnor" = SID-ner · "Hanke" = HAHN-kee · "Kwok" = KWOCK · "Harare" = hah-RAH-reh · "SkyMiles" = SKY-miles · "rand" = rand (South African currency).
